Aquilito Update

Wednesday evening **[Feb. 27]** about 45 people crowded into the small ministry center to pray together for Aquilito. When word that Aquilito had eaten chicken spread around the group it turned into a relaxed joyful time of praise, singing and prayer together. Aquiles prayed, "You are the God of the heavens and earth, all of creation and our God. . ." This was the man who graciously invited us into their home 6 years ago. They had attended our church for some time. When Roger asked them about becoming members to which Aquiles responded, "Take it easy pastor. Slow down." Roger did, but they haven't slowed down at all. We are so grateful for what God has done in their lives and now in Aquilito's life. This has certainly been a faith builder for many.

Aquilito is better. His blood tests are improving slowly but steadily. He is eating more than yogurt. His kidneys are producing urine more regularly, although that is still a matter of concern. Thank you for praying for this family! We are all deeply grateful!

Know of our prayers for you all tonight!
